

## **MATH 6**

The grade 6 mathematics program is designed so that students gain competence in fundamental arithmetic skills, operations, metric and customary units of measurement, percents, ratios, proportions, integers, and geometry. Classroom assessments will be used that are instructionally useful indicators of individual student growth and performance, not only to monitor each student's progress in meeting the State's learning standards but also to plan instruction.

AIS Math 6 is designed to supplement and reinforce the Math 6 program. Class sizes are small with a focus on individualized programs. Students are scheduled for AIS Math bases upon the level of score on the NYS Math Assessment Exam and/or teacher recommendation.
