

Thursdays, 3:45 - 5:15p.m.

Oct. 8, 15, 22, 29, Nov. 5, 12 *Snow date: 11/19/09*

Return registration form to school ASAP - deadline September 17.

1. A Pirate's Life for Me! with Karen McEachen & Barbara Moore. Ever wonder about what it would be like to sail the high seas on a pirate ship?

Why did pirates wear eye patches? How did pirates find treasure? Why was it buried afterward? Answer these questions and more. Create your own treasure map, design a pirate flag, eat like a pirate, and sing sea shanties. Come be a buccaneer with us! Arrrrrrrrgh! **Grades 4-5 LAB FEE**

2. Adirondack Dream Catcher

Farm with Cynthia Ruggiero. Meet small creatures from the farm and learn about their care. Have fun making art

from both natural and recycled objects while learning about the environment and conservation. A visual and hands on exploration program blending science, art and history. **Grades 4-6**

3. An Extraordinary Science Adventure with Lisa Whitman. Test

out principles of physics and chemistry as you "play" with slime, ice cream, rockets, cola, and exploding bottles (filled with dry ice) --- cool stuff! If you're not afraid to get down and dirty with science, put on your goggles and join us as we get down to work. **Grades 4-6**

4. Chinese Explore Chinese language and culture! Learn how to carry on a basic conversation, how to type Chinese on the computer, and how to create Chinese characters using a brush and ink. An

experienced language teacher who has lived in China will be your guide to this ancient language and culture!

Instructors: Carol Yang **Grades 4-5** or

William Michael O' Shea **Grades 6-7.**

5. Claymation Creations with Ellen Franklin-Furgason. Here's your chance to create your own clay characters just like

those you've seen animated on TV and film. It could be an animal, a funny person or a crazy creature made

up entirely from your imagination. Join a "production company" group and bring your clay characters to life through stop motion animation. You'll create your own short animated film clip to share with family and friends. Students are welcome to repeat this class.

Grades 4-5 LAB FEE

6. Creative Cartooning with Mary

Thompson. Come draw cartoons, caricatures and comic strips! Students will learn where the ideas for caricatures, cartoons and comic strips

came from while sharpening drawing skills and developing their own style and characters. Make your cartoon character with Sculpy! Students will need to bring a photo of him or her self to the first class.

Grades 4-7 LAB FEE

If you have taken Design It before, please select another class

7. Design It, Make It, Move It, Control It with Joel Jacko.

Design and construct various forms of model-size vehicles using air, rubber bands, motors and weights for power. Rallies and races will be the highlight at the end of the course. You'll have an exciting, hands-on experience using science, math and technology concepts. **Grades 4-7 LAB FEE**

8. Foundation in Drawing with

Pamela Stendardi. Explore the creative possibilities of line, shape, value and their uses in visual art. We will touch upon perspective, animals, people, and other subjects you are interested in learning how to draw! **Grades 4-7**

9. French in Motion! with

Francelise Dawkins. Learn the basics of French from a native speaker while you play games, move to the language, role play and even practice some comedy!

Grades 4-5

10. Gadget Prints and More! with Caroline Love Miller. Come have some creative fun messing around with prints and making fabulous things! In this class, you'll try a wildly fun technique called "gadget printing". Then, you'll learn to emboss on copper foil to make relief prints and an awesome handmade box. You'll also design your own stencil to personalize a tee shirt that you'll wear with pride. **Grades 4-7**

11. Horse Sense with The National Museum of Racing
Instructor: Karen Wheaton.
Become an expert on horses. Learn about their tack (saddles, bridles, etc.), grooming, feeding, anatomy, different breeds and famous horses in history. How do vets care for and treat horses? See the tools and supplies they use. **Grades 4-6**

If you have taken Junior Gourmet before, please select another class.

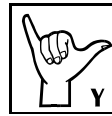

12. Junior Gourmet - with Chefs Maureen Clancy and Bruce Hoffmann. Become a junior chef in the BOCES commercial kitchen. Explore the exciting worlds of cooking and baking, and food service, plus take home samples to share with your family. **YUMMMM!!!! Grades 4-7 LAB FEE**

13. Knit It! with Eileen Minder. Knitting isn't just for little old ladies anymore! Take this course and you will learn a skill you can carry with you your whole life. Together we will explore the basic techniques of knitting while making everything from scarves to hacky sacks to blankets for those in need. If you're interested in keeping your mind engaged and expressing your creativity in a relaxing way, "Knit It!" is the course for you! **Grades 5-7**

14. Old Masters Don't Have to be Old with Carolyn Justice. Pastel, acrylic, and watercolor painting. Look at the styles of the Old Masters. How were they inspired? Find your own style and create a masterpiece! **Grades 4-5**

15. Sensational Signing with Margaret McIntyre. Learn American Sign Language by using your sensibilities: your eyes, your voice, your hands and your feelings. In this class we will explore Deaf Culture, not only with signing, but also with songs, crafts and games that make Sign Language easy and fun to learn.

Grades 4-7

16. Shakespeare Shorts Theater with Anna Fowler. If you've ever wanted to star in some of the greatest roles of all time, this is your chance. Whether supernatural, crazy, heroic, ridiculous, nasty or romantic, the characters of the English Bard each have their moments of glory on the stage. You will get to speak some of the most famous lines ever written, in the original language. Every actor will play at least two fantastic Shakespearean characters in a rollicking show where each tale is done in ten minutes. This is a course for experienced actors and beginners alike, with theater games such as "Freeze", "Slideshow" and "Echo" adding to the fun. The final class will involve a performance in the Black Box Theater. **Grades 4-7**

17. Who Dunit? CSI and Forensics with David Foldi. Wonder what it's like to be a CSI investigator? Students will learn scientific concepts through small class activities of an actual forensics case. Through analysis of fingerprint, blood, hair and handwriting evidence, students will solve the "crime." Students will "sketch" a suspect and use the latest in computer simulations to "capture" a criminal.

Grades 5-7 LAB FEE Internet Use

18. You Can Do Magic with Alan Edstrom. If you love magic tricks and wondered how they're done - here's your chance! Sponge balls, coins, cards and everyday objects become the tools of your trade with "You Can Do Magic with Alan Edstrom". Alan Edstrom has performed magic with the top pros from The Magic Castle in Hollywood to the Toyota Comedy Festival in NYC, and First Night Saratoga, and now brings his skills to you.

Grades 4-7
